

Nexperia Scope 3 Emissions Report 2024

Scope 3 GHG emissions

A company's overall carbon footprint comprises both direct and indirect greenhouse gas (GHG) emissions, categorized as Scope 1, 2, and 3. According to the Greenhouse Gas Protocol, Scope 3 emissions are indirect emissions that occur throughout a company's value chain and are not included in Scope 2. These emissions are divided into 15 categories spanning the upstream and downstream segments of the value chain.

Our approach

Nexperia recognizes the importance of addressing emissions impacts across our entire value chain. In 2025, we took a significant step toward sustainability and transparency by conducting our first Scope 3 emissions inventory.

We report on the Scope 3 emission for Nexperia Holding B.V. according to the operational control approach for the period of January 1 to December 31, 2024. The calculation is based on the Greenhouse Gas Protocol Corporate Value Chain (Scope 3) Accounting and Reporting Standard. The Scope 3 emissions are calculated by category in accordance with the guidelines of the GHG Protocol Standard, at least "minimum boundaries".

Scope 3 GHG emissions by category

The categories that have been included in the calculation of our Scope 3 emissions are presented below. Nexperia is currently not reporting on the categories “Processing of sold products” and “Use of sold products”.

	2024
Total Scope 3 GHG emissions in tCO₂e	718,923
Purchased goods and services	448,428
Capital goods	46,450
Fuel- and energy-related activities	131,615
Upstream transportation and distribution	62,258
Waste generated in operations	4,889
Business travel	3,651
Employee commuting	8,789
Downstream transportation and distribution	8,770
End-of-life treatment of sold products	1,209
Downstream leased assets	2,864

The absolute Scope 3 emissions in 2024 amounted to 718,923 tCO₂e, with the majority of emissions caused by purchased goods and services.

Limitations

Measuring Scope 3 emissions is an evolving undertaking that involves collaboration with a wide range of stakeholders. Due to the nature of the highly complex accounting process, we consider this assessment as an ongoing effort. Over the coming years, we will continue to refine our methodologies and incorporate stepwise further primary data to improve accuracy and reliability of our assessment. This will result in changes or updates of our Scope 3 accounting. Thus, continuous improvements are both expected and necessary.
